

NOUVEL 18

Nature's Inspiration French Sophistication

An outstanding masterpiece of architectural
ingenuity intertwined with inspirations of nature...

In the beginning, a vision takes shape. Soon, a magnificent concept evolves. Inspired by the verdant surroundings of the prestigious Ardmore and Anderson locale. Creation forms into Nouvel 18, a bold and captivating architecture that soars above the milieu with gardens that grow in the sky.

Jean Nouvel

Critically acclaimed French concept designer

Pritzker Prize winner

He has no particular style.

He defies categorisation, preferring to experiment and mix the extraordinary. His approaches demonstrate a high level of originality and have become his signature. He is Pritzker Prize winner and architect extraordinaire, Jean Nouvel.

His buildings are dialogues that engage the city, each with a unique story to tell. His bold strokes and the courage to push an idea to its limit are catalysts for his groundbreaking and contradicting masterpieces around the world.

Nouvel 18 showcases the master's radical style. An exceptional architecture that is set to redefine the Singapore skyline.

"I don't like architecture of the future. I like architecture of today. Modernity is always a succession of instants."

Nouvel 18 is designed with considerations of the geography, history, colours, vegetation and landscapes. In the words of the master architect himself, “buildings are not done only to be the most beautiful, but also to give advantage to the surroundings. Each architecture is the missing piece of the puzzle, to create poetry with the place”.

FRENCH MODERN

Nouvel 18, a dialogue with the city

True to Jean Nouvel's signature approach to design, Nouvel 18 is a poetic statement of modernity and biodiversity. With only 156 exquisite units, this freehold 36-storey development of two towers is a dramatic, modernist form that infuses life with nature to create a voice that engages the city.

In the prime and lush Ardmore and Anderson enclaves, the main tower showcases a network of vertical greenery amidst a striking facade. The masterful arrangement of complementary tones of glass, creates an ever-changing palette from every different angle. The elegant beauty of the singular square tower is also further enhanced by having all four frontages distinctively unique, making Nouvel 18 a true architecture masterpiece.

The Gateway Boulevard – The buzz of city life dissipates the moment you drive through the dramatic driveway lit by a linear strip of natural lighting

The Arrival Lobby – Be welcomed by a vista of sophisticated elegance and understated grandeur as you arrive home to accustomed luxury

Let the lights take you into the night

The development reveals its elegant soul at night, through the lighting mastery of L'Observatoire International. Based in New York, this award-winning lighting design and consulting firm creates a sophisticated tapestry of light to enhance an ambience of true luxury that could be appreciated both near and far.

When night falls, artfully positioned lighting turns the landscaping of Nouvel 18 into an emerald green beacon of nature that flows from the ground up into the sky. Landscape areas and sky terraces are also transformed by subtle lighting, creating a luxuriously inviting mood that seduces the senses. And in the spectacular sky gardens, unique organic lanterns seemingly grow from the trees to cast soft light upon pathways dotted with enchanting lamps which are designed exclusively for Nouvel 18. The play of light and shadows is almost whimsical; the effect, simply breathtaking.

Subtle lighting creates an inviting mood to seduce the senses, transforming the eight sky terraces into luxurious relaxation havens
